

TEETH WHITENING PROS AND CONS

Teeth whitening is a cosmetic dental treatment that utilizes whitening products to make patients teeth whiter and brighter. Hydrogen peroxide and carbamide peroxide are the most common whitening agents used in teeth whitening treatment. Patients may choose to whiten their teeth at home, or schedule an appointment for professional teeth whitening.

PROS

- Does not harm tooth enamel
- Appear more attractive
- Improves confidence
- Lessens appearance of wrinkles
- Makes you appear successful
- Creates a youthful look

CONS

- Temporarily sensitive teeth
- Some treatments can be expensive
- Can cause temporary gum sensitivity
- Cannot be used on veneers or crowns
